Our range includes exquisite textured or non-textured Venetian plaster,metallic and concrete finishes for both interior and exterior applications.

NON - TEXTURED PAINTS

Products, Tools & Our Experience

1.2 - 1.5 m²/kg/for three layers

Decomin Decoveno Stucco Venetian Polished Plaster

Interior
Marble Effect

Let's create an amazing space with Decoveno Stucco!

1. Prepare the Surface:

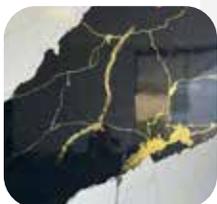

- › Make sure that the surface is dry, clean and smooth.
- › Apply Decomin Universal Base Primer with a roller or a brush to create a smooth base

3. Let it Dry and Smooth Out:

- › Let the plaster dry completely after each layer (4-6h waiting of time between the layers)
- › After being sure that it's dry completely use fine sandpaper to smooth out any rough spots, achieving a flawless finish between layers.

5. Final Step - Shine and Protect:

- › Once everything is dry, polish the surface with your steel trowel.
- › For extra shine and protection, apply Decomin Universal Wax with a sponge or a trowel as the final coat.
- › 30 min. after the wax application, polish the wall with a buffer

2. Apply the First Coat:

- › Use a steel trowel, hold it at a slight angle (approximately 15 to 30 degrees).
- › Spread 1-3 layers of Decoveno Stucco with smooth strokes.

4. Add Your Personal Touch:

- › Get creative! Use a spatula, brush or another trowel to add patterns or textures as you wish.
- › If you'd like to have different color, you can tint with any acrylic paints/colorant. You can use it partly or with the entire bucket.

Recommended tools for the application

- › Decoveno Universal Base Primer
- › Steel Trowel
- › Roller or Brush
- › Acrylic Colorant (if you want to mix colors)
- › Sandpaper
- › Sponge
- › Decomin Universal Wax (in case you prefer shining effect instead of matt one)

Main Colors:

White

Black

Light Grey

Dark Grey

Green

Blue

Cream

Decomin Tornado Decorative Coating

 Interior
Velvet Effect

Let's create Velvet effect with Decomin Tornado!

1. Prepare the Surface:

- › Make sure that the surface is dry, clean and smooth.
- › Apply Decomin Universal Base Primer with a roller or a brush to create a smooth base

2. Initial Coating:

- › You can tint Tornado silver silky base color with any acrylic colorant if you desire
- › Apply Tornado in two layers using a roller, trowel or a brush depending on the finish you desire
- › You can use plastic and steel trowels to create desired patterns on second coat while it's almost dry

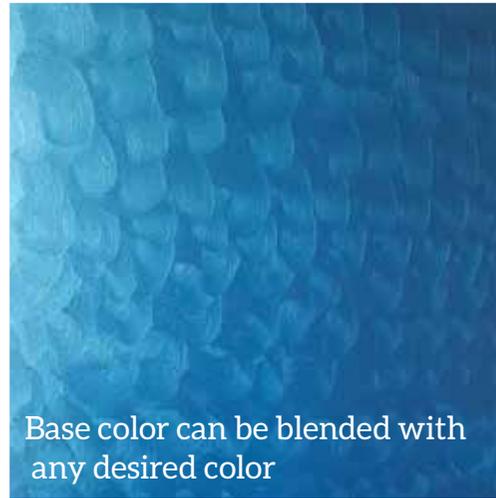

3. Temperature Considerations for Optimal Application:

- › Once everything is dry, polish the surface with your steel trowel.
- › For extra shine and protection, apply Decomin Universal Wax with a sponge or a trowel as the final coat.
- › 30 min. after the wax application, polish the wall with a buffer.

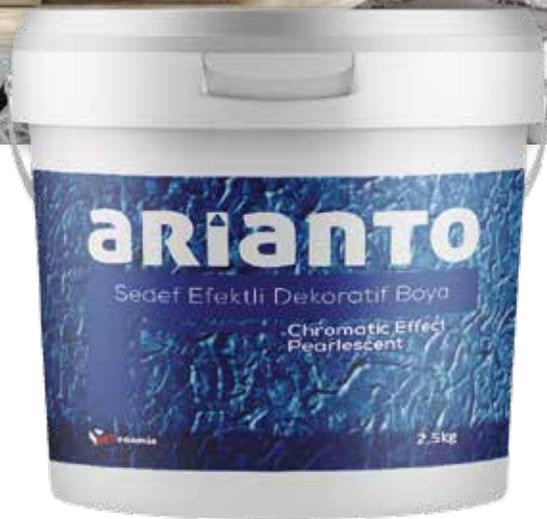

Recommended tools for the application

- › Decomin Universal Base Primer
- › Roller, Brush or Steel Trowel
- › Acrylic Colorant

Base color can be blended with any desired color

6 m²/kg

Decomin Arianto Decorative Paint

Interior
Chromatic Effect

Let's create Chromatic Effect with Decomin Arianto

1. Prepare the Surface:

- › Make sure that the surface is dry, clean and smooth.
- › Apply Decomin Universal Base Primer with a roller or a brush to create a smooth base

2. Apply the Decomin Arianto:

- › Once the surface is completely dry, apply 2 more layers with a brush or a roller.
- › Create your desired image with any decorative tool immediately after application.

Recommended tools for the application

- › Decomin Universal Base Primer
- › Roller and Brush

Helpful Tips!

- › Please wait 4 hours for each layer to dry
- › Make sure the application and drying occur at temperature of +5°C and above for the best result
- › Clean hand tools after each application to maintain their effectiveness.

TEXTURED PAINTS
Products, Tools & Our Experience

6,5-8 m²/kg

Decomin Fiesta
ART Fine & Rich Texture

Interior
Metallic Effect

1. Prepare the Surface:

- › Make sure that the surface is dry, clean and smooth.
- › Apply Decomin Universal Quartz Primer with a roller or a brush to create a smooth base

2. First Layer:

- › Apply the first layer of Fiesta Fine or Rich texture paint using a brush.

3. Second Coat:

- › Apply the second layer with a brush after minimum waiting of time (2-3 hours)

4. Temperature Considerations for Optimal Application:

- › Store in closed packaging between +5°C to +20°C

Recommended tools for the application

- › Decomin Universal Primer
- › Brush

Helpful Tips!

- › 2-3 hours waiting of time between the layers
- › Final drying time at approximate 23°C is 24 hours

1-1.5 m²/kg

Decomin Travertino Stone Effect Plaster

 Exterior

 Interior

Traverten Effect

Let's create Traverten effect with Decomin Travertino

1. Prepare the Surface:

- › Make sure that the surface is dry, clean and smooth.
- › Apply Decomin Quartz Primer with a brush or a roller to create a smooth base

2. Apply the Base Coat:

- › Apply Travertino in approximate 1.5-2mm thick layer using a trowel.

3. Second Layer & Creating the Pattern:

- › You can create a pattern by pulling a roller brush across the surface while the base layer is still wet.

4. Add the Traverten Effect:

- › Apply Acrylic Colorant to the surface to enhance the traverten effect.
- › Use a sponge, brush, or roller for applying a layer
- › Remove excess pigment with a spatula, ensuring only the grooves are painted.

5. Final Drying and Durability:

- › Let the layer dry at approximate 20°C for 6-8 hours with an approximate 65% humidity
- › The coating reaches its highest durability after 7 days of drying.

Recommended tools for the application

- › Decomin Universal Quartz Primer
- › Trowel
- › Roller or Brush
- › Sponge
- › Acrylic Colorant (for having your desired color)

* More Elastic than Deconcreto

Base color can be blended with any desired color

1-1.5 m²/kg

Decomin Deconcreto Concrete Effect Plaster

 Exterior

 Interior

Concrete Effect

Create a Natural Concrete Look with Decomin Deconcreto

1. Prepare the Surface:

- › Make sure that the surface is dry, clean and smooth.
- › Apply Decomin Quartz Primer with a brush or a roller to create a smooth base.

2. Apply the Base Coat:

- › 6 hours after primer application, apply a single layer of Deconcreto to the surface with a steel trowel.
- › Let the layer dry completely.

3. Create the Concrete Pattern:

- › Apply a second, thicker layer of Deconcreto to the surface with a steel trowel.
- › Use a nail trowel or other decorative tools to create the desired pattern while the material is still wet.

4. Final Step:

- › Finalize the pattern with a trowel.

Recommended tools for the application

- › Decomin Universal Quartz Primer
- › Steel Trowel
- › Nail Trowel
- › Patter on the surface if you desire

* More Strong looking than Travertino

Helpful Tips!

- › Please wait 4 hours for each layer to dry
- › Make sure the application and drying occur at temperature of +5°C and above for the best result
- › Clean hand tools after each application to maintain their effectiveness.
